Reasons for saving under the heads mentioned above have not been intimated (April 1987).

- (v) Suspense: The expenditure under revenue section of the grant include Rs. 2,95.85 lakhs under "Suspense". The minor head "Suspense" is not a final head of account. It accommodates interim transactions for which further operation (generally of payment or adjustment of value) are necessary before the transaction can be considered complete and finally accounted for. The operations in 1985-86 under this minor head were under the sub-heads (1) purchases, (2) Stock and (3) Miscellaneous Works Advances. The transactions under each of these heads are explained below:—
- (1) Purchases: When meterials are received from a supplier or from another division or department either for a specific work or for stock, their value is credited to "Purchases" so that per contra, the cost may be included at once in the accounts of the work or stock. When payment is made the head, "Purchases" is debited. The head, "Purchases" therefore, shows a negative (credi) balance which represents the value of stores received but not paid for.
- (2) Stock: This head is debited with all expenditure connected with acquisition of stock of materials and with manufacturing operations relating thereto. It is credited with the value of materials issued to works or sold or otherwise disposed of and the balance represents the book value of materials in stock plus the unadjusted charges, etc. connected with the manufacture.

(3) Miscellaneous Works Advances: Accommodates (a) sales on credit, (b) expenditure incurred on deposit works in excess of deposits received, (c) losses retrenchments, errors, etc. and (d) other items. Broadly speaking, the head is debited with all the sums which are eventually to be recovered. The balance under this head represents recoverable amounts.

The transactions during 1985—86 under each sub-head of "Suspense" under various major heads of accounts operated in this grant are given below:—
