Reasons for saving in the 1st case and those for non-utilisation of fund in the last one have not been intimated (September, 1995)

(vi) Suspense The expenditure under revenue section of the grant includes 31 96 lakhs under "Suspense" The minor head "Suspense" is not a final head od account. It accommodates interim transaction for which further operations (generally of payment or adjustment of value) are necessary before the transaction can be considered completely and finally accounted for The operations in 1994-95 under the minor heads were under the sub-heads (1) Purchases, (2) Stock and (3) Miscellaneous Works Advances

The transactions under each of the heads are explained below -

- (1) Purchase When materials are received from a supplier or from another division or department either for a specific work or for stock, their value is credited to "Purchases" so that per contra, the cost may be included at once in the accounts of the works or stock. When payment is made, the head "Purchases" is debited. The head "Purchases" therefore, shows a negative (credit) balance which indicates that the stores were received but the value there of was not paid for
- (2) Stock I his head is debited with all expenditure connected with acquisition of stock of materials and with manufacturing operations relating thereof. It is credited with the value of materials issued to works or sold or otherwise disposed of and the balance represents the book value of materials in stock plus the unadjusted charges, tec connected with the manufacture
- (3) Miscellaneous Works Advances Accommodate (a) sales on credit, (b) expenditure incurred on deposit works in excess of deposit received (c) losses, retrenchment, errors, etc and (d) other items. Broadly speaking, the head is debited with all the sums which are eventually to be recovered. The balance under the head represents recoverable amounts. The transactions during 1994-95 under the various sub-heads of "Suspense" operated in the grant are given below.
